Purchase TuneCable iMazon Recorder

Quick Link:

To learn more about and download the latest version of TuneCable iMazon Recorder, please visit its homepage:

- ❖ [Visit TuneCable iMazon Recorder Homepage](#)

To buy a license key for TuneCable iMazon Recorder, please visit its online store:

- ❖ [Purchase TuneCable iMazon Recorder Win](#)
- ❖ [Purchase TuneCable iMazon Recorder Mac](#)

1. Why should I buy TuneCable iMazon Recorder?

The free trial version of TuneCable iMazon Recorder enables you to convert the first 1 minute of each song. After purchasing, you'll receive your registration key to unlock this limitation.

2. What benefits do I have after registration?

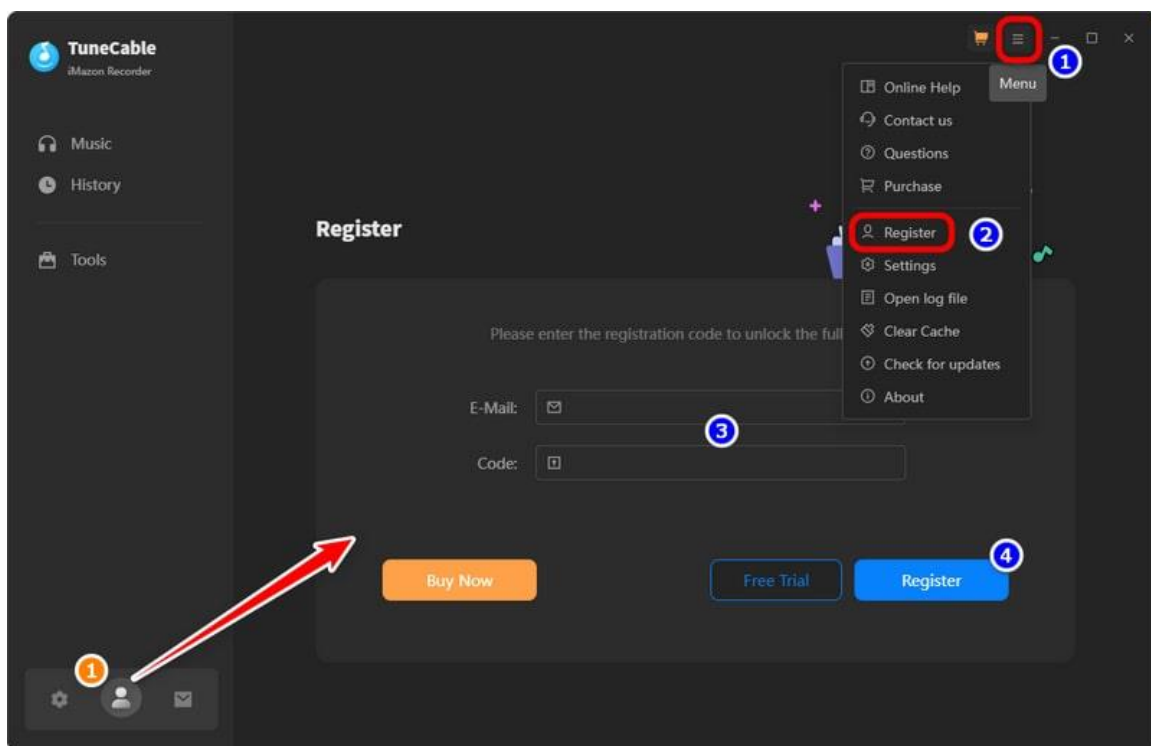

- You can enjoy the full functions and features of TuneCable.

- You can enjoy lifetime FREE updates of the latest versions of TuneCable.
- You can enjoy FREE technical support.

Register TuneCable iMazon Recorder

Step 1. Step 1. Run TuneCable iMazon Recorder on your Windows PC or Mac computer and then head to the lower left corner to hit the avatar icon. Or click the top-right "**Menu**" button and choose "**Register**" in the drop-down list. You will see an interface below.

Step 2. Please copy and paste the registration Email and Code you received into the registration dialog box in case of any wrong input. Then click on the "**Register**" button.

Note: The registration info is case-sensitive. And, please do not add space at the beginning or the end of the word. Make sure both the Email address and key code are the same as what we provide in the confirmation email you receive after buying the program. If not, an error message will pop up as below:

Please enter a valid license code, [or buy a new one.](#)

E-Mail:

Code:

Registration failed, please directly copy and paste the code from the confirmation email you received. Make sure you have downloaded correct program and retry.

[Confirm](#) [Cancel](#)

The image shows a dark-themed registration error dialog box. At the top, it says 'Please enter a valid license code, or buy a new one.' with a blue link. Below this are two input fields: 'E-Mail:' with an envelope icon and 'Code:' with a key icon. A red error message states: 'Registration failed, please directly copy and paste the code from the confirmation email you received. Make sure you have downloaded correct program and retry.' At the bottom are two buttons: 'Confirm' (blue) and 'Cancel' (gray).

- [Tools on TuneCable iMazon Recorder](#)

Download Music from the Amazon Music App / Web Player

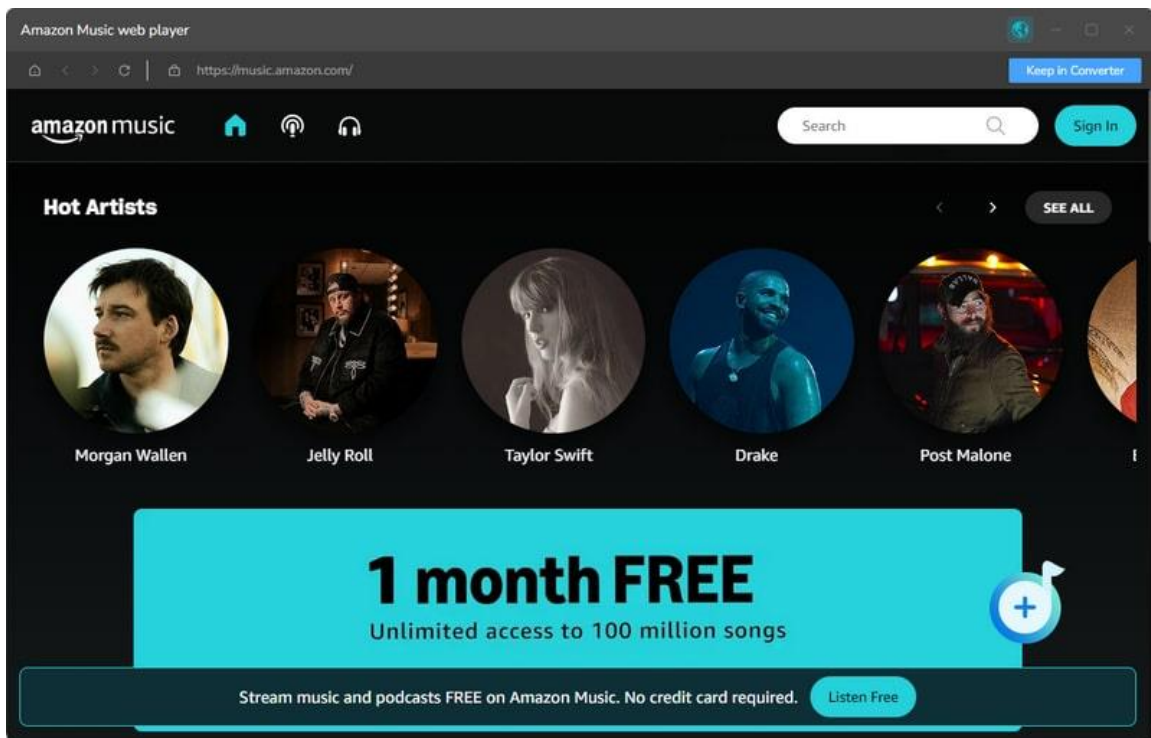

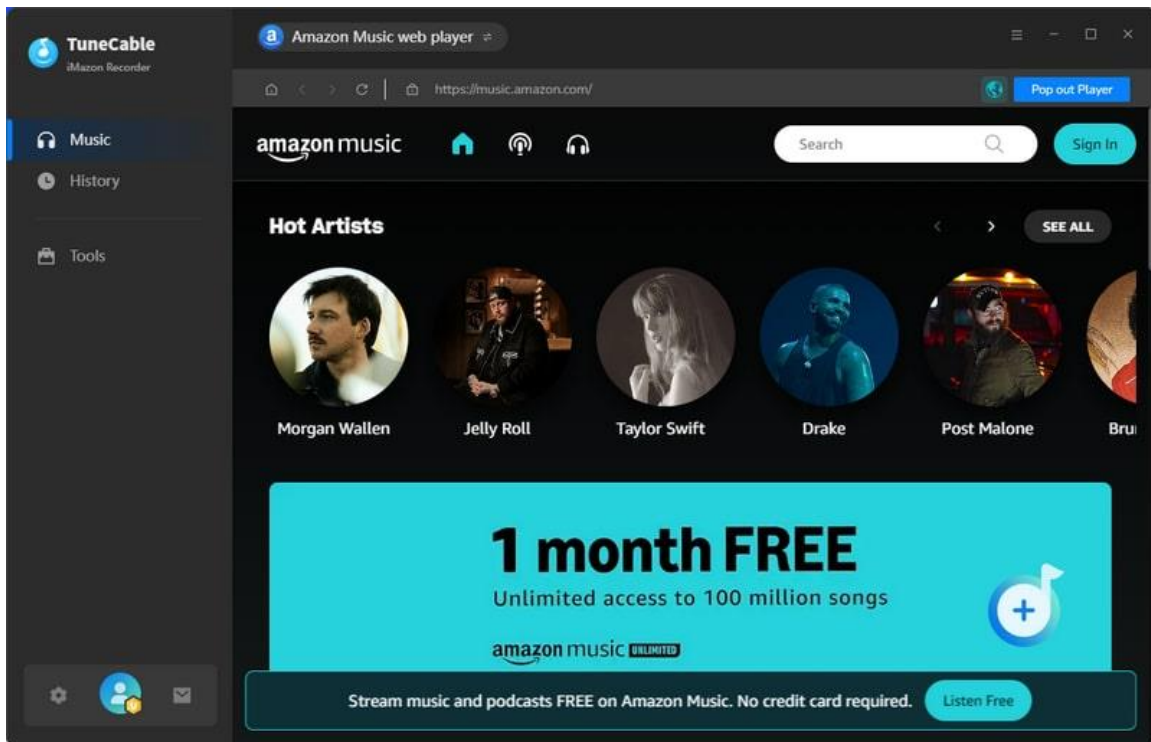

TuneCable iMazon Recorder is capable of downloading Amazon Music songs from both the Amazon Music app and the web player. The biggest differences are the highest output quality and conversion speed - downloading music from the Amazon Music app can keep up to Ultra HD quality at up to 5x speed, downloading music from the Amazon Music web player can save up to HD Amazon songs at up to 10x fast speed.

Step 1. Open TuneCable Mazon Recorder

If you select to download Amazon Music with the app, the Amazon Music app would be opened automatically. If not, tap on "**Open App**". If you want to download music from the Amazon Music web player, just go to the top navigation bar and select "**Amazon Music web player**" to switch download source. Then, you need to log in to your Amazon Music account.

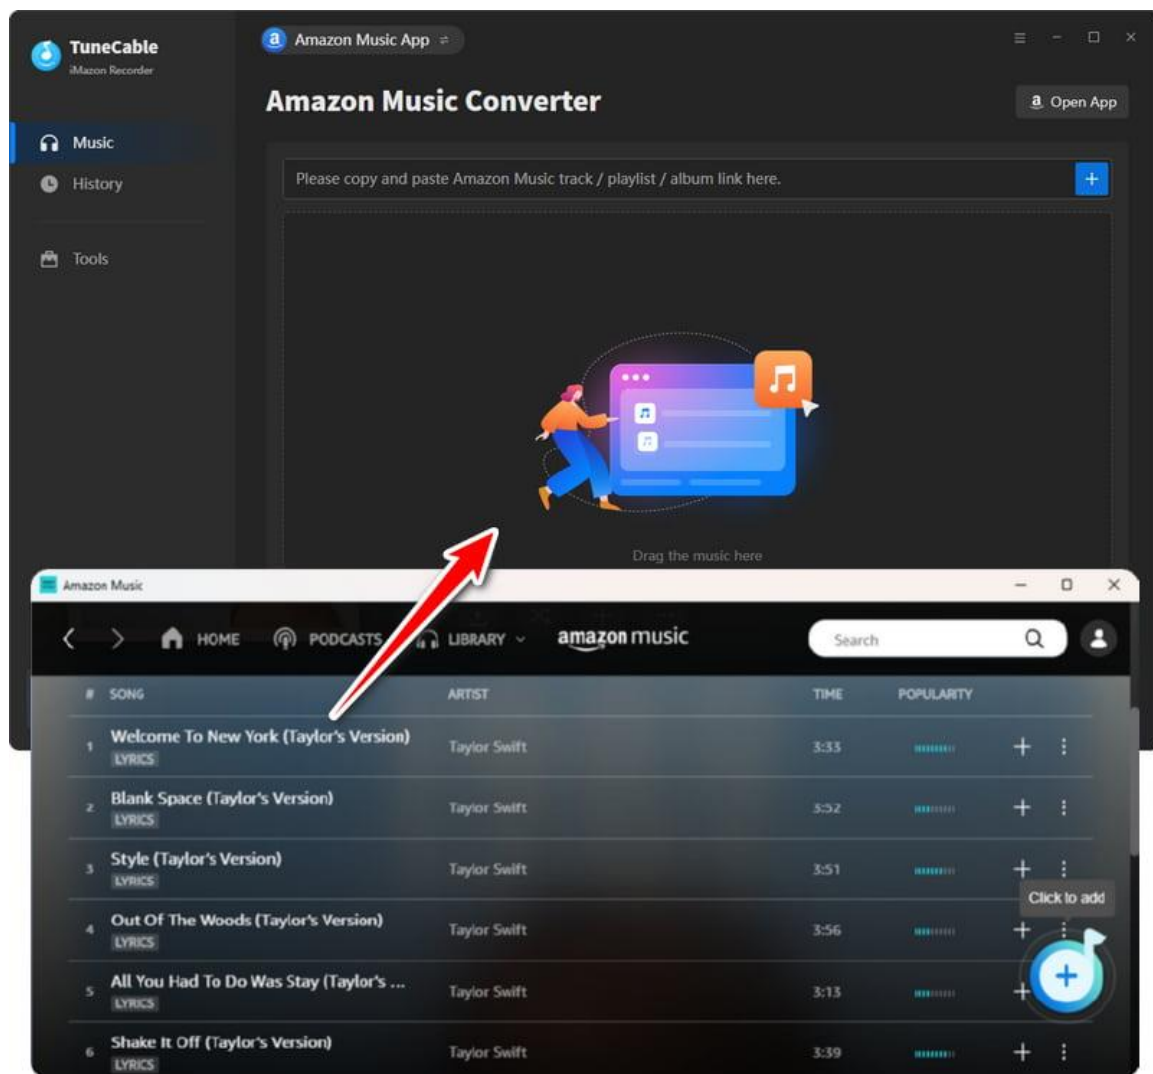

Tips: By clicking "**Keep in Converter**" or "**Pop out Player**", you can decide how the web player is located.

Step 2. Find Preferred Amazon Music Album or Playlist

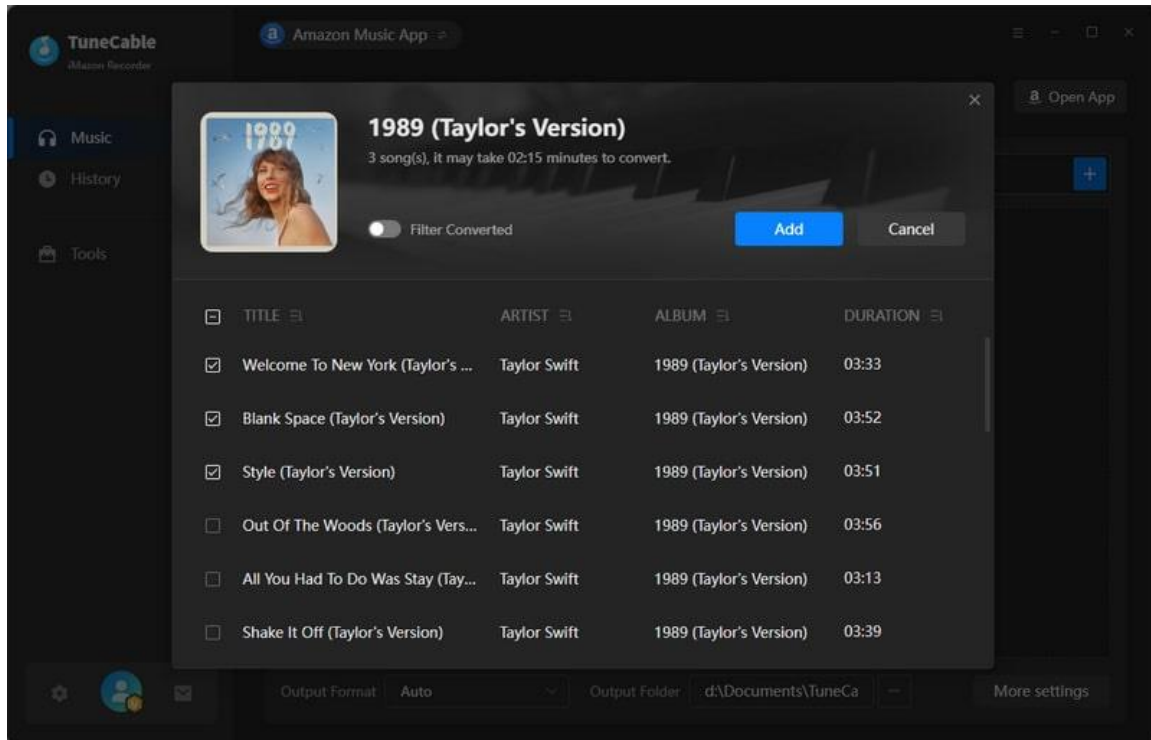

Go through and open your favorite songs, albums, playlists, or podcasts on Amazon Music app or web player. There are three ways to add songs to TuneCable.

- **Method 1.** Click and hold on to the title, drag and drop it to TuneCable. (Only available when downloading music from the Amazon Music app)
- **Method 2.** Copy and paste the link to TuneCable to parse music. (Only available when downloading music from the Amazon Music app)
- **Method 3.** Hit the "**Click to add**" button floating in the bottom right.

Step 3. Select Amazon Music Tracks

TuneCable will read and load the songs on a popup. Pick the songs you want and click on "**Add**" to save them to TuneCable.

Step 4. Change the Output Settings

Before downloading, go to the "**Settings**" module in the lower left corner. Change the settings to your needs, such as output format, sound quality, output folder, etc. Here we list all the options.

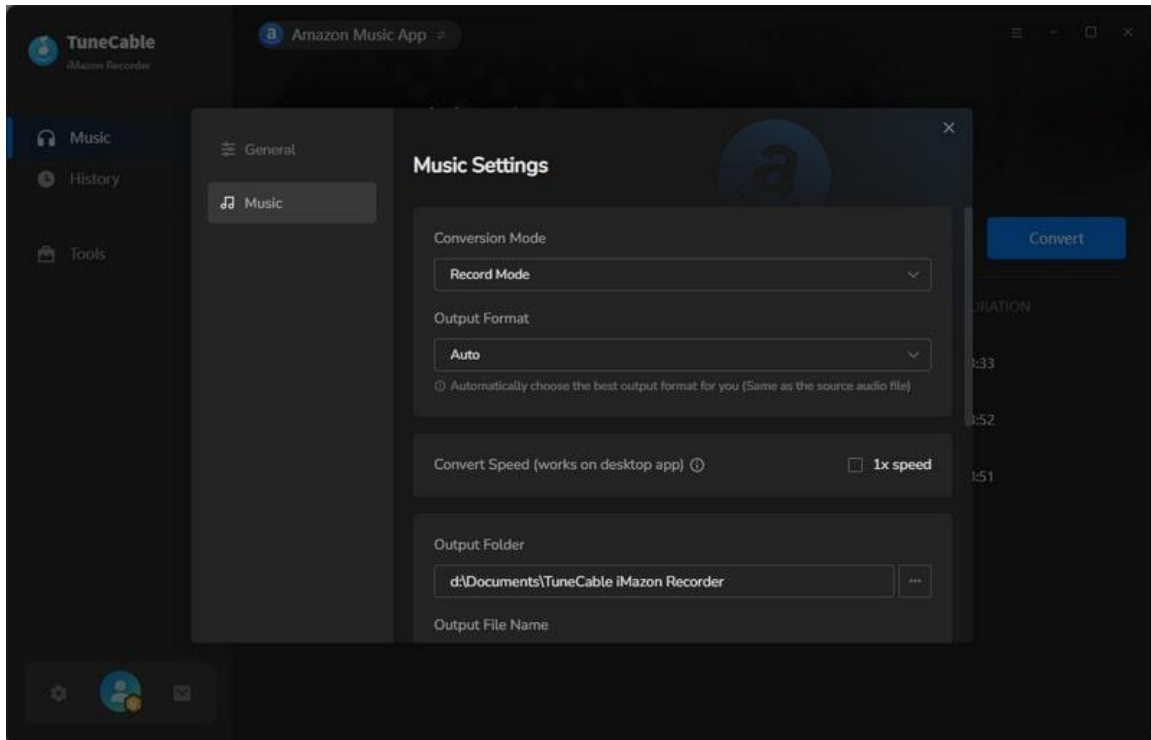

- **Conversion Mode:** Intelligent Mode, Record Mode, YouTube Mode
- **Output Format:** Auto, MP3, AAC, WAV, AIFF, ALAC, FLAC
- **Bit Rate:** 128kbps, 192kbps, 256kbps, 320kbps (available for MP3, AAC)
- **Bit Depth:** 16 bit, 24 bit (available for WAV, AIFF, ALAC, FLAC)

- **Sample Rate:** 44.1kHz, 48kHz, 96kHz, 192kHz
- **Output Folder:** To your preference
- **Output File Name:** Track Number, Title, Artist, Album, Playlist Index, Year
- **Output Organized:** None, Playlist, Artist, Album, Artist/Album, Album/Artist, Playlist/Artist, Playlist/Album

Note:

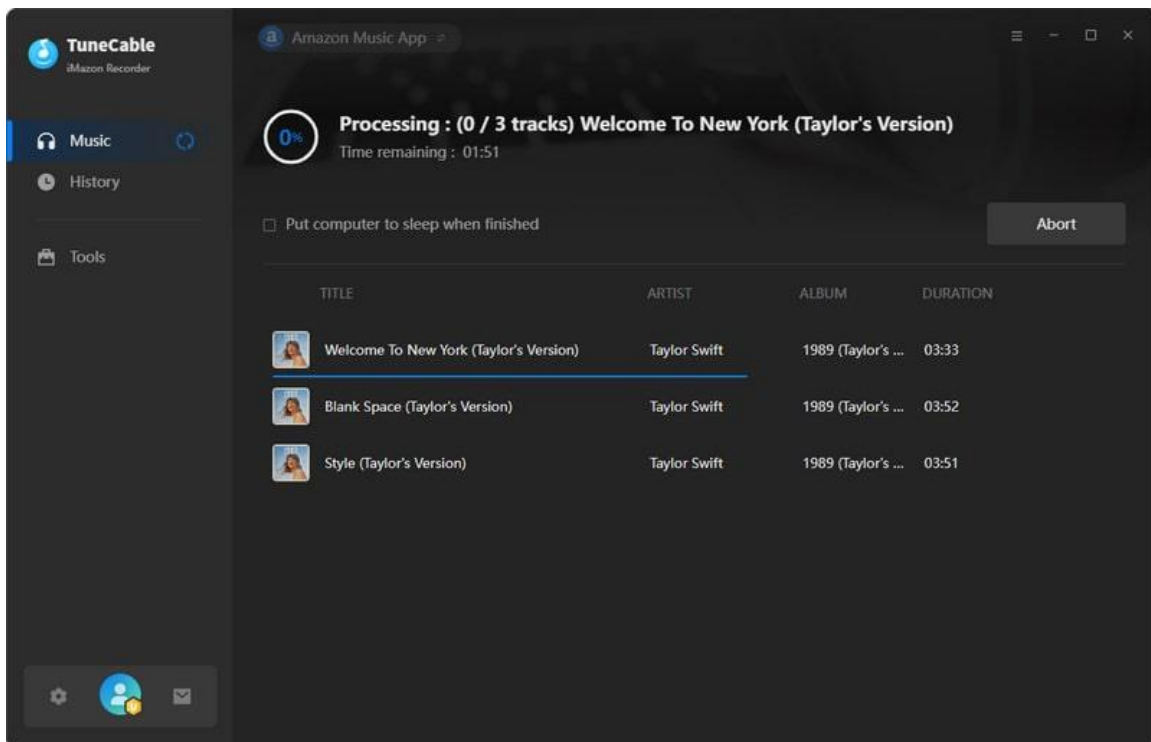

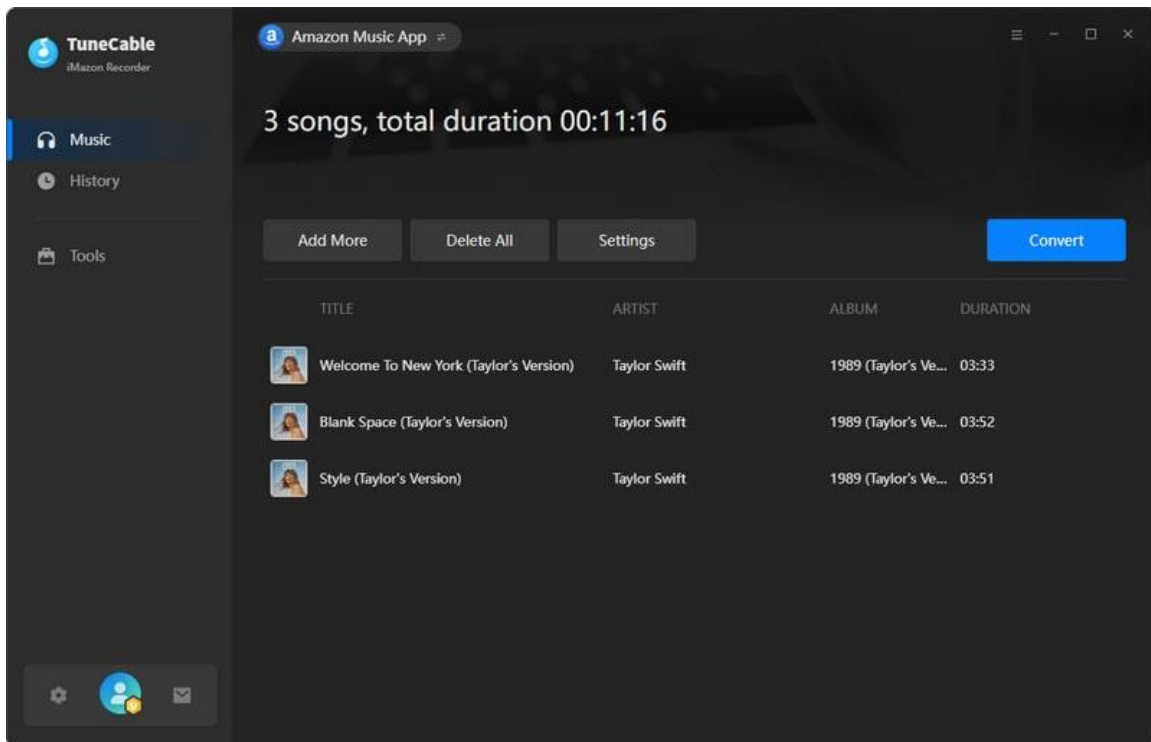

1. If you select "**Auto**" as the output format and select "**Record Mode**" as the conversion mode, TuneCable will download the songs with the original format and audio quality. And up to **Ultra HD** quality will be saved.
2. To download music from Amazon Music app or web player, use **Record Mode**. If your network connection is unstable, switch to **YouTube Mode** to download the same song from YouTube. **Intelligent Mode** means TuneCable automatically switches between downloading music from Amazon Music app / web player or YouTube based on your network condition.
3. To download playlists in original order, go to TuneCable's main interface lower left, and click the "**Settings**" icon. Under "**Output File Name**", keep just "**Playlist Index**" and "**Title**". Then, under "**Output Organized**", choose "**Playlist**".

Step 5. Start Converting Amazon Music

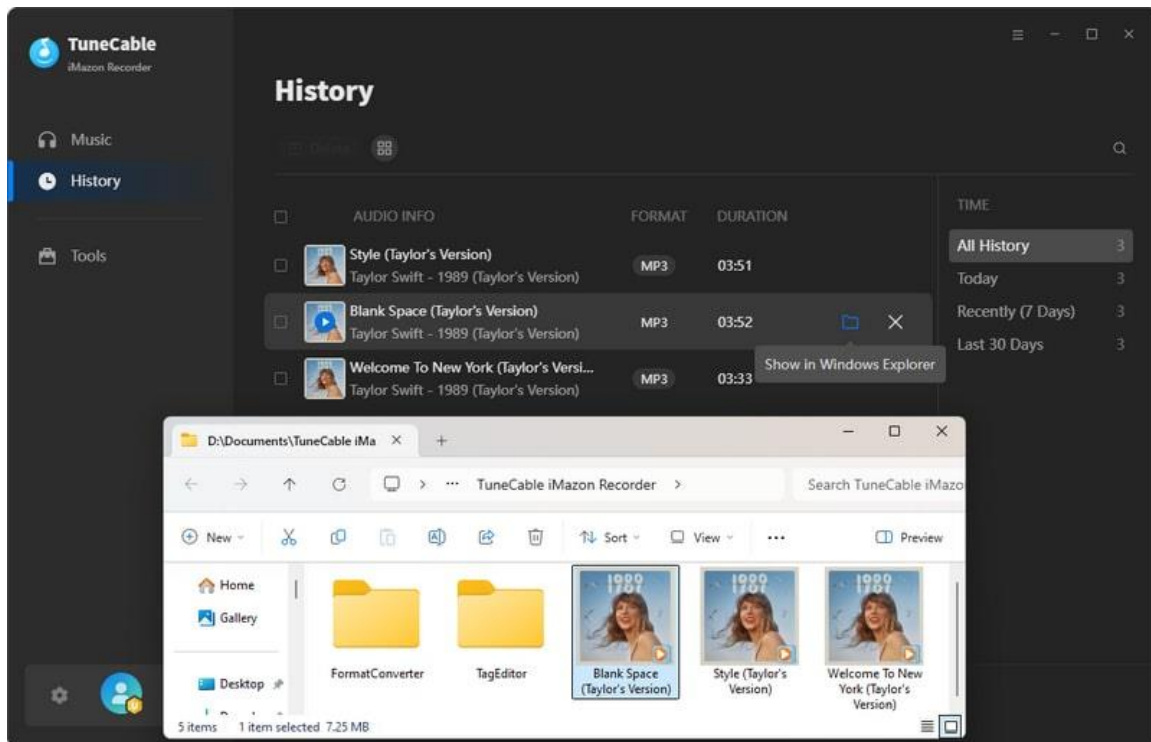

Clicking the "**Add More**" button here will allow you to add more songs too. You can also drag and drop more songs. After adding, click on "**Convert**", and TuneCable will start downloading the songs at up to **5x** speed under the Amazon Music app mode or at up to 10x under the web player mode.

(Note: When using the Mac version, the Amazon Music app mode only supports converting music at 1x speed.)

Step 6. Check Converted Amazon Music

Once the conversion is completed, click the **"folder icon"** to locate each track. Also, you can click the **"History"** tab to find the well-converted music on your local drive.

Tools on TuneCable iMazon Recorder
